Medical College in India- An Overview

The medical discipline today offshoots into multiple specialized streams providing the students with leisure of choice. The introduction of newer courses and increasing number of students has urged the need of more medical colleges, and India today enlists a plethora of medical institutions spread all over the country.

However, only a chosen few are capable of carving a niche in the area and are categorized as 'premier' or 'Top' medical institutes. To seek admission in their desired [top medical college in India](#), students who have appeared for their 12th Board exams take the All India Pre Medical Test (AIPMT), a yearly college entrance examination conducted by the Central Board of Secondary Education, Delhi. Qualifying this screening ensure students to pursue MBBS and BDS from several medical colleges of different rankings on the basis of the percentage scored. Some of the best known [medical colleges in North India](#) that are basically government owned are AIIMS (All India Institute of Medical Sciences), Delhi University College of Medical Sciences, Sanjay Gandhi Postgraduate Institute of Medical Sciences and Christian Medical College & Hospital. A rare number of private players did enter the medical education arena and became a successful name apart from the Hindustan Institute of Dental Sciences (HIDS), an establishment of the Sharda Group of Institutions.

Incepted in the year 2006 in Greater Noida, HIDS was soon approved by DCI (Dental Council of India), Ministry of Health, Govt. of India and affiliated under by CCS University, Merrut. These accreditations are testimonials of the mark that the college has made over a very short span of time and lived up to the promise it spoke of. It is the quality in every respect that this dental college, set up by the Sharda Group, exudes the fact that it stands on a platform considered to be prestigious amongst the bunch of eminent medical colleges. The things that are sure to be watched out for are the experienced faculty members engaged in teaching the aspiring students. They are stalwarts in their field of study and intend to infuse the same knowledge and zeal in the students too. To keep the student-teacher ratio at a comfortable balance, seats for the dentistry course are kept to a limited number of only 100 so that special attention could be showered on every individual student.

A beautiful state-of-the-art infrastructure felicitates the students with practical learning experience so as to hone their competency. A central library with a collection of latest medical books, journals are available on each subject as per DCI recommendation.

Computer/internet room, student common room, audio-visual room along with a comprehensive dental clinic that house proper sterilization area, lab and special equipment are some of the facilities provided by HIDS. These features make HIDS stand at the forefront of medical colleges in India, especially in the northern part of India and a ground for aspirants of dentistry to excel. Dental Colleges in India - An Overview

Dental Education has received a nusus owing to the amplitude of scope and career prospect that the subject promises. A recent study shows that by the near end of 2007, a number of more than 80,000 students would successfully complete their BDS and MDS degree from legion of dental colleges across India. This signifies an ascending number of students who are interested to take up dentistry by profession.

Having said that, one can definitely predict an increase in the set up of [dental college in India](#). Among the casket of these already present and yet-to-come-in-near-future dental education centers, Hindustan Institute of Dental Sciences (HIDS), is and will always outstand the others because of its inherent values and principles that synthesise with their incessantly upgraded technique of imparting education.

An endeavour of Sharda Group of Institutions, Hindustan Institute of Dental Sciences came into existence in the year 2006, in Greater Noida. The college is one of renowned BDS College in India. The quality of education rendered by HIDS to the dental aspirants is evident from the brisk approval of the college by the Dental Council of India, Ministry Of Health, India and running [CCS Approved Courses](#) by CCS University, Meerut. The four year Bachelors degree course in dentistry run by the organisation is meant not only for delivering curriculum-oriented theoretical and practical knowledge to the students but also enrich them with the know-how of contemporary researches conducted globally and instil a professional approach towards their work.

Presently the number of seats defined for the BDS degree course in HIDS is 100. Admission to these seats is based on merit over the minimum eligibility criteria of 55% marks secured in the 12th standard board examination with PCB as subject combination or qualifying the All India Pre Medical Test arranged by the Central Board of Secondary Education. Every student is encouraged to take up specialization paper that range from dental surgery, cosmetic dentistry to orthodontistry and others. After completing the course it is essential to command an internship experience of 1 year to start up with dental practice. HIDS is active in assisting their students to get an on-hand experience in different dental health care centres or in [Sharda Hospital](#), owned by the Sharda Group of Institutions.

The well laid out infrastructural facilities and assistance invigorates freedom of thought and new experimentation promoting the overall growth and development of motivated individuals who gears up not with the mercenary aspect in mind but the philanthropic motif of serving the society at large.

The fact that Dental treatment in the western countries is extremely expensive and cost at least 10 times more than it is in India, is attracting more and more students to take up this stream. Hindustan Institute of Dental Sciences crusades the challenge to train and groom young doctors in dentistry to imprint a mark internationally through a culture of academic integrity and value-based intellectual growth. Need for Medical Council of India Approved Courses

The field of medical studies has witnessed widespread development over the past few years. The medical profession is continuously revamped with new ideas and new technologies. The diagnosis and treatments that was earlier handled singly by the general practitioner is today divided amongst a posse of specialists and with better results. Thus, specialisation is inevitable for the medical students who seek to carve a niche for themselves in this profession. Though climbing the ladder of success has become more complicated and arduous than even before but the positive aspect is that the opportunities for medical aspirants have multiplied. In the last two decades the country has witnessed a sudden surge in the establishment of medical colleges which has earned it an epithet "mushrooming of medical colleges". The pliable Universities and Councils were used to bend rules, fuel corruption and violate standards of quality for accelerating the business of medical education. This scenario brings in the importance of medical council of India in picture.

Established in 1934, The Medical Council of India (MCI) was aimed to bring in uniform standards of higher qualification in Medicine and recognition of medical qualification in India and abroad. The main objectives with which the MCI was formed are as follows:

- Standardisation of medical education both at undergraduate and postgraduate level
- It gives recommendation to the state as well as central government about approval and disapproval of medical institutions in India
- MCI gives permanent and provisional registration to doctors with recognised medical qualification

Since its inception in 1934 the Medical Council of India has been taking care that new medical institutions approved by it stick to the parameters set by it. It also takes care that each MCI approved college maintains the quality standard of medical education. This is the reason why we need Medical Council of India Recognised Colleges.

The economy of the country has been booming after the Indian government had started liberalisation system in 1990s and its impact had fallen on the education system of the country. Liberalisation allowed higher education particularly in the field of medicine and healthcare to flourish with the participation of private bodies. It resulted in the establishment of many private colleges which got its recognition from medical council of India or dental council of India. And in this exhaustive list Sharda Group of Institutions (SGI) have carved an indelible mark in the realm of dentistry with the establishment of Hindustan Institute of Dental Sciences (HIDS).

To fulfill the dreams of those who want to make career in dental profession, the Sharda Group of Institutions (SGI), came into existence in 1996 with core aim to train students with world class competencies and cutting edge proficiency to face challenges of global markets with confidence. The institute provides an excellent infrastructure with highly experienced faculty to fulfill their dreams. The courses offered by the institute are approved by DCI (Dental Council of India), Ministry of Health, Govt. of India, affiliated and [CCS Approved Courses](#).

Brief Introduction To Medical Colleges In India

Medical colleges lay the edifice for worthwhile careers in the field of medicine for aspiring doctors, therapists, nurses and technicians. These multiple specialised streams offer students the freedom of opting for the stream in which they wish to excel. With the introduction of newer courses and an increasing number of students, a plethora of medical institutions has sprung up in various parts of India. Some well-known medical colleges in north India include All India Institute of Medical Sciences (AIIMS), Delhi University College of Medical Sciences, Christian Medical College & Hospital, Maharaja Agarsen Institute of Medical Research & Education, Maulana Azad Medical College and Sanjay Gandhi Postgraduate Institute of Medical Sciences.

If you too wish to carve out a niche in the medical discipline, the first step is to seek admission in a reputable medical college. Students who have appeared for their Class XIIth Board examinations sit for the All India Pre-Medical Test, an annual entrance exam conducted by CBSE, Delhi. Students who pass this test qualify to pursue BDS or MBBS from various [medical colleges in north India](#) and other parts of the country. While some students enroll themselves in government owned medical institutes, others choose privately run colleges for pursuing their medical courses in India. Amongst the privately owned medical colleges, the Hindustan Institute of Dental Sciences (HIDS), under the tutelage of the Sharda Group of Institutions (SGI) is a name to reckon with. For further information about the SGI Group, Medical Council of India recognised colleges and [DCI recognised colleges](#), visit www.sgei.org.

The SGI has been committed to provide an effectual environment to help students in developing to their full potential and mature into fully functional professionals. At HIDS too, the SGI endeavours to impart knowledge and technical skills in an academic environment, which is conducive to transform young aspirants into competent doctors, who are fully adept at facing the challenges of the changing global world. Hindustan Institute of Dental Sciences is approved by the DCI, Ministry of Health, Govt. of India and is affiliated to the CCS University in Meerut. Infrastructure facilities include a central library with an extensive collection of books, journals and research papers, computer room, student common rooms, well-equipped lecture halls and comprehensive dental clinic replete with sterilisation area and special equipment.

Strong infrastructure support and an accomplished faculty, make HIDS one of the best medical colleges in north India and the finest institute for aspirants to excel in dental sciences. Visit www.sgei.org for more information.

Superspeciality Hospital - For Affordable Healthcare

India is witnessing a radical positive change in the healthcare sector. Commercialisation of healthcare facilities is on the downhill and a holistic approach is on the rise. This process of evolution has developed a new ilk of hospitals termed as 'Super-speciality Hospital'. However, all of them do not succeed to live up to the concept but one that is making a remarkable progress to realise the true spirit behind the ideology is Sharda Hospital (Hindustan Institute of Medical Sciences and Research), founded by Sharda Group of Institutions (SGI) in 2005.

Build over a stretch of 62.79 acres of land area in Greater Noida, Sharda Hospital is strategically situated to facilitate convenient access for more and more patients, thereby gaining the opportunity to serve a wide expanse of population. This [multispecialty hospital](#) already has 300 functional beds with a 1200 bed project towards completion. Consultation rooms with O.P.D facility from 9.00 am, emergency and trauma services operating on 24x7 bases are beneficial to the economically weaker sections of the society who are unable to afford a visit to specialists. However, any critical case detected is dealt with by concerned specialists via the consultation department. 50 bedded I.C.U, five major operation theatres coupled with labor rooms and Minimal Access Surgery departments are considerably helpful in the direction.

To expand the purview of its modus operandi, Sharda [Superspecialty hospital](#) has been planning out ways to set-up health centres in different rural and backward areas of Greater Noida, other parts of India and globally in the near future to reach maximum number of patients. Furnished with modern equipments and intensively trained doctors and staffs we intend to provide essential as well as sophisticated treatment and medication to the deprived lot of the society. We are striving incessantly to develop mobile medical stations that serve as one-stop-solution for the poor suffering from any kind of ailments and extend free and confidential treatment to make the world a healthy place to live in. Also periodical free-medical check-up centres would be arranged to ensure the success of such programs executed.

To engage best methods for smooth functioning of the complete process and churn out even better paths to increase the scope of the effort, this super-specialty hospital has been persistently involved in research studies, experimental activities, and extensive training to medical students to deliver improved quality healthcare.

The objective cherished by [Sharda Hospital](#) is completely sociocorporate in nature and its endeavour proves to be philanthropic that is meted out with commendable rendition of corporate social responsibility. For further information, log on to www.sgei.org.
