CHOOSE A RIGHT PATHWAY AREAS

To Begin Your Track

We ensure that you get ready for the corporate life through our unique blend of teaching.

WORKSHOPS

Watching a sporting event on television can be enjoyable, but actually seeing it live, surrounded by cheering fans, provides a much more encompassing experience. Teaching and learning can become inherently spontaneous and student-centred when moved from the confines of the classroom into the world at large. Students get the opportunity to explore real challenges and acquire a deeper knowledge to resolve the issues.

FIELD TEACHING

Field experience are unmatched in their learning potential. Field experiences early in a student's career can be formative and can inspire students to continue in a field.

LIVE PROJECTS

Learning experiences outside the classroom are inherently interdisciplinary. Live projects are Integral part of our curriculum. Our pedagogy is oriented towards giving students hands on experience through labs in association with Industries.

PERSONALITY DEVELOPMENT

Special programmes are conducted to improve student's personality. Several training sessions on soft skills etiquettes, presentation skills, personal grooming etc., are held, wherein all students participate.

GUEST LECTURES

We maintains a relationship with an impressive network of partners, both individuals and business partners, who offers many opportunities throughout the year for students to visit a local business or meet with a particular individual whose expertise and success inspires and educates. Getting a chance to meet with our guests often helps students identify their own personal path to pursue.

LIVE CASE STUDIES

The use of case studies in classroom serves several important purposes. By exposing students to numerous cases of varying complexity, students gradually evolve from possessing a cursory understanding of the material to an expertise in the subject. The case study is effective in non-traditional learning environments where important lessons are taught outside of the classroom.

COMMUNITY ENGAGEMENT

Greater learning potentials and community benefits rest in more intensive forms of service learning projects. These projects, typically designed by both faculty and community partners, allow for students to learn in highly effective ways while helping a community address its needs.

RICH INTELLECTUAL POOL

SGI boast of rich pool of intellectual capital. Lot of focus has been laid while selecting the finest faculty. The faculty shares industrial experience, modern ways of teaching e.g. web based learning, smart classrooms training and also share their experience and research with the students and make sure that this transfer of knowledge becomes fruitful and ineffaceable experience for the scholars.
